EXECUTIVE OVERVIEW

CC Tech, established in 2019, is a Minority-Owned Small Business and DC Certified Business Enterprise (CBE). We specialize in advanced software solutions and comprehensive cloud services for public agencies, non-profits, and commercial enterprises. Our certified AWS and cybersecurity professionals deliver expertise in Cloud Operations, Security Operations, Call Centers, Software Development, and Business Process Outsourcing.

As an AWS partner, we manage complex cloud strategy, planning, and implementation to optimize operational efficiency, enabling clients to focus on their core business objectives.

BUSINESS DATA

- DUNS: 118195425
- CAGE: 9HAQ0
- SAM: ZHUBHSLKSUX9
- DC CBE Number: LSDZ56373072026
- DC CBE | SBE | LBE | DBE | DZE
- Certified **AWS Public Sector Partner**

CONTRACT VEHICLES

- DC Supply Schedule (MOBIS)
- NASPO ValuePoint
- DC STaR/STaR2

PARTNERSHIPS

CORE COMPETENCIES

- AWS Cloud and IT Infrastructure Modernization
- Security Assessment and Risk Management
- Application and Software Development
- Data Engineering and Analytics
- Staff Augmentation Solutions
- Professional Services Delivery
- Project and Program Management
- End-to-End Call Center Operations
- Intelligent Document Processing and Automation

AWS CORE COMPETENCIES

- Data Analytics and Insights
- **AI/ML Solutions**
- AWS Landing Zone Implementation
- Cloud Migration Services
- Cloud-Native Development
- DevOps Engineering
- Digital Workplace Solutions
- Amazon Connect Integration
- AWS Proof-of-Concept Development
- AWS Well-Architected Reviews

ZERO TRUST IMPLEMENTATIONS

CC Tech has a proven track record in deploying comprehensive Zero Trust solutions, leveraging the latest in cybersecurity technology. Our team's expertise spans several key areas, each critical to the development and maintenance of a robust Zero Trust environment:

- **Zscaler Implementations:** For our customers, we've configured Zscaler Internet Access (ZIA) and Zscaler Private Access (ZPA), ensuring secure internet and network access through inline content inspection, SSL decryption, and access control policies. This practice enforces the Zero Trust principle of "never trust, always verify."
- **Okta Deployments:** We've centralized identity management for various clients by integrating Okta, employing Single Sign-On (SSO) and Multi-Factor Authentication (MFA) to establish stringent authentication and authorization controls as required by Zero Trust frameworks.
- **CrowdStrike Falcon Utilization:** Utilizing CrowdStrike Falcon, we've enhanced threat detection and response for our clients, utilizing AI and behavioral analytics for immediate monitoring. Our deployment includes custom detection rules and automated responses to quickly neutralize threats, aligning with Zero Trust security principles.
- **Qualys for Vulnerability Management:** We've conducted extensive vulnerability scans and compliance checks using Qualys for our clients, automating the process to efficiently identify, prioritize, and remediate vulnerabilities, thus maintaining the high security and compliance standards intrinsic to Zero Trust architectures.

OUR TEAM'S SECURITY CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- Zscaler Zero Trust Certified Associate (ZTCA)
- CompTIA Security+
- AWS Certified Security - Specialty
- AWS Certified Solutions Architect - Professional
- Certified Identity and Access Management (CIAM)
- CyberArk Certified Delivery Engineer (CDE)

CO-DEVELOPED SECURITY PRODUCTS

Perimeter Security with Predictive Intelligence:
Patented predictive threat intelligence that puts the power of predictive threat intelligence to work for you in a platform that will improve your security posture and streamline SOC operations.

CC Tech's team comprises seasoned professionals with experiences from notable organizations such as Accenture, Amazon, AstraZeneca, Booz Allen, Capital One, and Deloitte, offering a profound understanding of the challenges and requirements of federal agencies.

With over 85 years of combined experience in consulting, implementation, and innovation within high technology, cybersecurity, and cloud services, our team is uniquely positioned to address the sophisticated needs of State & Local Government and its federal customers.
